- Time Management

EDUCATION

UNIVERSITAS DJUANDA

S1 Computer Science
2022 – 2026 · Graduating October 2026

LANGUAGES

- Indonesian (Native)
- English (Intermediate)

PROFESSIONAL SUMMARY

Computer Science graduate and software developer who has independently designed, built, and shipped 4 mobile apps and 2 websites from concept to deployment. Hands-on experience across the full product lifecycle, from architecture and UI implementation to state management, data handling, and iteration. Seeking a full-time software engineering role, while open to contract and freelance opportunities.

PROJECTS

VESTA - Personal Finance Tracker (Flutter, Hive, Provider)

Offline-first finance app with calming "Whispering UI," featuring auth, dashboard, transactions, and stats charts, fully shipped.

ORBIT - Cosmic Memory Time Capsule (Flutter, Hive, CustomPainter)

Letter-to-future-self app with an interactive galaxy UI (CustomPainter-based), fully offline by design, optimized for 60fps.

KelomApp - Productivity & Task Management (Flutter, Riverpod, Drift)

Gamified productivity app: kanban tasks, project timelines, Pomodoro focus mode, full glassmorphism UI.

Lumora Coffee - F&B App + Website (Flutter + Next.js/TypeScript/Tailwind)

Cross-platform coffee shop product: mobile ordering/loyalty app and animated marketing website from one rebrand.

WORK EXPERIENCE

Content & Visual Design Lead - DPM, Universitas Djuanda (2024-2025)

Led visual design for public communication materials across the organization's campaigns. Coordinated with multiple divisions to deliver materials on tight deadlines.

Field Data Program - Dinas Pendidikan Kota Bogor (2024)

Verified and processed administrative education data across multiple schools, ensuring accuracy for reporting. Built a Streamlit dashboard to monitor and visualize education data, replacing manual reporting.
